Predicts and helps prevent lows with zero fingersticks*

When life gets busy, the fear of going low can really get in your way. Whether you’re asleep, hard at work, exercising, or enjoying a much-needed vacation, the t:slim X2™ Insulin Pump with Basal-IQ™ Technology can help you spend less time worrying about lows and more time living your life.

**Zero Fingersticks**

0 fingersticks required for calibration or mealtime dosing when using the t:slim X2 Pump with Dexcom G6® Continuous Glucose Monitoring (CGM).*

**Less time low**

31% relative reduction overall in sensor time below 70 mg/dL when clinical study participants used Basal-IQ Technology.¹

**Simple to use**

91% of clinical study participants said the Basal-IQ feature on the t:slim X2 Insulin Pump was easy to use.¹

---

*If glucose alerts and CGM readings do not match symptoms or expectations, use a blood glucose meter to make diabetes treatment decisions.
How does Basal-IQ Technology Work?

The Basal-IQ feature helps reduce the frequency and duration of low-glucose events by predicting glucose levels 30 minutes ahead and suspending insulin if they are expected to drop below 80 mg/dL.

With Dexcom G6 CGM integration, the Basal-IQ feature works with no fingersticks required for mealtime dosing or calibration.* Other benefits include an extended 10-day wear, acetaminophen blocking§ and the ability to share real-time CGM data with up to five followers.^

Additional feature updates are not currently available for the t:slim X2 Pump with Basal-IQ Technology and are subject to future FDA approvals. A prescription and additional training may be required to access certain future software updates. Charges may apply.¶

Tested to a depth of 3 feet for 30 minutes (IPX7). § Dexcom G6 CGM readings can be used to make diabetes treatment decisions when taking up to a maximum acetaminophen dose of 1,000 mg every six hours. Taking a higher dose may affect the Dexcom G6 CGM readings. ^ Separate Follow App required.

Additional feature updates are not currently available for the t:slim X2 Pump with Basal-IQ Technology and are subject to future FDA approvals. A prescription and additional training may be required to access certain future software updates. Charges may apply. ¶

Predicts glucose 30 minutes ahead

Suspends insulin to help avoid the low

Resumes insulin once glucose rises

Dexcom G6 CGM Integration

With Dexcom G6 CGM integration, the Basal-IQ feature works with no fingersticks required for mealtime dosing or calibration.* Other benefits include an extended 10-day wear, acetaminophen blocking§ and the ability to share real-time CGM data with up to five followers.*

Important Safety Information: RX ONLY. The t:slim X2 Insulin Pump with Basal-IQ Technology (the System) consists of the t:slim X2 Insulin Pump, which contains Basal-IQ Technology, and a compatible CGM. CGM sold separately. The t:slim X2 Insulin Pump is intended for the subcutaneous delivery of insulin, at set and variable rates, for the management of diabetes mellitus in persons requiring insulin. The t:slim X2 Insulin Pump can be used solely for continuous insulin delivery and as part of the System. When the System is used with a compatible iCGM, Basal-IQ Technology can be used to suspend insulin delivery based on CGM sensor readings. Interpretation of the System results should be based on the trends and patterns seen with several sequential readings over time. CGM also aids in the detection of episodes of hyperglycemia and hypoglycemia, facilitating both acute and long-term therapy adjustments. Compatible iCGM systems are intended for single patient use and require a prescription. The System is indicated for use in individuals 6 years of age and greater. The System is intended for single patient use and requires a prescription. The System is indicated for use with NovoLog or Humalog U-100 insulin. The System is not approved for use in pregnant women, persons on dialysis, or critically ill patients.
